

Important Setup

DVR Model:

- N400
- N800
- N1600

1 DISPLAY OUTPUT RESOLUTION

- 1) Go to MAIN MENU
- 2) Select PARAMETER category
- 3) Select DISPLAY tab
- 4) Select OUTPUT sub tab
- 5) Under VGA/HDMI Resolution setup, choose the highest resolution your monitor could support (recommended: 1920 x 1080)
- 6) Click SAVE button

2 TIME & DATE

- 1) Go to MAIN MENU
- 2) Select SYSTEM category
- 3) Select GENERAL tab
- 4) Select GENERAL sub tab
- 5) Key-in your current country time & date
- 6) Click SAVE button

3 SUB STREAM VIDEO QUALITY & STREAMING SPEED

- 1) Go to MAIN MENU
- 2) Select PARAMETER category
- 3) Select NETWORK tab
- 4) Select SUB STREAM sub tab
- 5) Under BITRATE category, select the desired streaming video quality accordingly to your internet broadband subscription speed to avoid slow mobile remote streaming

Recommended settings

Broadband speed under 1MB

64 bitrate

Broadband speed under 4MB

128 bitrate

Broadband speed under 10MB

256 bitrate

Broadband speed under 20MB

256 bitrate or above

Remark:

- 1) Lower bitrate will produce lower video quality but faster video streaming
- 2) higher bitrate will produce better video quality but slower video streaming if your broadband speed are slow

- 6) Click SAVE button
